MHB Awarded with EPCIC Contract for SK408W Jerun Development Project, Offshore Sarawak

Malaysia Marine and Heavy Engineering Sdn Bhd (MMHE), a wholly owned subsidiary of Malaysia Marine and Heavy Engineering Holdings Berhad (MHB), has secured a contract from SapuraOMV Upstream (Sarawak) Inc. to undertake the engineering, procurement, construction, transportation & installation, and hook-up & commissioning services (EPCIC) for the SK408W Jerun Development Project, offshore Sarawak.

Information on the SK408W Jerun Development Project

This EPCIC contract comprises the construction of an approximately 15,000-metric tonne (MT) topside, 10,000 MT jacket and 5,000 MT piles of Central Processing Platform (CPP). It also includes the design engineering of a 30-inch carbon steel pipeline with a length equivalent to 80 kilometres distance from this CPP to the existing E11R-B platform to commingle with the existing trunkline to PETRONAS Malaysia LNG Plant in Bintulu, Sarawak.

Upon completion, the facilities will be installed in Jerun gas field, which lies in the SK408W Block located offshore Bintulu, Sarawak. SapuraOMV Upstream (Sarawak) Inc. is the Operator of SK408W Block, with Sarawak Shell Berhad and PETRONAS Carigali Sdn. Bhd. holding 30% equity interest, each.

Quote by MD & CEO of MHB

Encik Pandai Othman, Managing Director and Chief Executive Officer of MHB said, “We are truly honoured to have been entrusted with such a significant project by SapuraOMV Upstream (Sarawak) Inc. and partners. This is indeed an acknowledgement of our technical competencies and commercial competitiveness in this industry and demonstrates MHB’s capability in providing integrated and value-added solutions. Backed by our skilled, experienced and passionate workforce, we are fully committed to deliver this project safely, timely and meeting the stringent quality requirements of the Client.”

“As I have mentioned before, the industry is now getting back on an upturn after the slowdown in 2020 due to the low oil price and COVID-19 pandemic, resulting in CAPEX cutback by oil and gas giants due to the uncertainties in the industry. 2021 has been coined as our recovery year and what a better way to start it other than with a major EPCIC project like Jerun.”

“With this being our first project with SapuraOMV, we hope this marks the beginning of a long-lasting business relationship and mutual support between the two companies.” he added.

About MHB

Malaysia Marine and Heavy Engineering Holdings Berhad (MHB) is a globally trusted energy and marine solutions provider for a wide range of heavy engineering facilities and vessels.

MHB has more than 40 years of track record in delivering integrated and complex solutions to domestic and international oil & gas customers. We are recognised for our global expertise in deepwater support services, offshore conversion services and LNG vessel repair and dry docking. MHB also owns and operates a regional Centre of Excellence – a learning centre that produces technically expert workers for the industry.

Backed by an exceptional track record, a highly skilled workforce and world-class facilities, MHB is able to provide innovative solutions to meet the complex demands of the energy industry - safely, on time and within cost.

- Full range EPCIC services for heavy engineering construction
- Complete conversion works in one location
- Comprehensive marine repair, refurbishment, upgrading and life extension of vessels and rigs
